

7300S

MODEL

True Three Phase Solid State Contactor for use with Short Wave Infrared or Resistive Loads

Specification Sheet

- **Current range from 16 to 160 amps at 45°C**
- **Voltage up to 500V**
- **CE, UL, cUL approvals**
- **Inputs:**
 - AC or DC
 - Analogue 4-20mA
- **Suitable for SWIR or resistive loads**
- **Overtemperature shutdown for fan cooled units (over 100 amps)**
- **Alarm options include:**
 - Thyristor short circuit
 - Overtemperature
 - Diagnostic load failure detection

A range of three phase, three leg solid state contactors for use with short wave infrared (SWIR) and Low Temperature Coefficient resistive loads.

Ratings

The current ratings of the 7300S cover the range from 16 to 160 amps. The voltage rating extends to a maximum of 500 volts.

Inputs

These units can, depending on the order code, be driven by either DC or AC Logic signals or an analogue 4-20mA input which gives a linear time proportional output.

Fusing

In all cases the output is zero voltage switching. High speed fuses are mounted external to the unit for 100 amps and below, internal above 100 amps. They can be ordered as part of the 7300S order code. Spare fuses or complete fuse and fuseholder assemblies can also be ordered separately.

Alarm

The 7300S has an optional thyristor short circuit and total load failure alarm.

An overtemperature shut down is provided for fan cooled units (over 100 amps). An optional overtemperature alarm is also available.

Diagnostic Load Failure detection is an option which alarms on the loss of one or more parallel heating elements (resistive or SWIR). The sensitivity is maximum one out of four. It is auto-setting via a front panel push button.

Digital communications

The Modbus communications option allows digital control of the unit, interrogation of the alarms, firing status, voltage feedback loop, adjustable burst firing and on line configuration.

International approvals

CE (EN60947-4-3), UL and cUL (file number E86160)

Example of 7300S layout

Signal connections

	29	GND	

SPECIFICATION

Power

Nominal current:	16 A to 160 A at 45°C ambient (see order code)
Nominal voltage:	200 VAC to 500 VAC (see order code)
Frequency:	47 to 63 Hz
Auxiliary supply:	Self-powered from supply network
Fan supply:	≥125A 115VAC or 230VAC (10mA)
Dissipated power	

Per amp per phase: 1.3W (approx). Allow 2 W per amp per phase to include fuse dissipation

Cooling	Rating ≤100A:	Natural convection
	Rating ≥125A:	Fan-cooled

Load

Three-phase industrial load

Use category:	AC-51 Resistive load with low temperature coefficient AC-55b Short wave infrared elements for units ≤ 100A
---------------	---

Load configuration:	Star with neutral (4S) Star without neutral (3S) Closed delta (3D) Open delta (6D)
---------------------	---

Control

Control type

Analogue:	4-20mA
DC Logic:	4.5 to 32VDC maximum (ON >4.5, OFF <3V or ON >9mA, OFF <0.5mA)
AC Logic:	100 to 230VAC maximum (ON >85VAC, OFF <10VAC) impedance 7KΩ@90HZ

Firing mode

Firing:	For Logic inputs the firing is ON/OFF with zero voltage switching. For analogue 4-20mA input the firing mode is Fast Cycle firing. The cycle time at 50% demand is 0.6 seconds (0.3 seconds ON and 0.3 seconds OFF). Output linearity better than + or - 2%. Open loop control (no supply voltage compensation)
---------	---

Physical data

Rating (A)	H(mm)	W(mm)	D(mm)			
			Basic	Comms	DLF	DLF + Comms
16-40	220	96	164	189	214	239
63-100	305	144	295	295	372	372
125-160	498	144	295	295	372	372

Digital communication

Optional Modbus communication running at 9600 or 19200 baud, allows the units to be controlled and monitored by a supervisory system

Alarm options

Diagnostic alarms (DLF)

Serious alarms: Unit overtemperature, thyristor short circuit and load open circuit signalled by set LED and relay contact

Partial load failure: Detects the failure of at least 1 element out of 4 in 3S, 4S, 6D configuration and 1 element out of 3 in 3D configuration signalled by DLF LED and relay contact

Alarm relay

Available with alarm options. The relay contact (0.25 A 230 Vac; 32 Vdc) is either open or closed on alarm depending on the code

Environment

Temperature	Use: 0°C to 45°C at max. altitude of 2000m Storage: -10°C to 70°C
Pollution:	Degree 2 acceptable (defined by IEC 664)
Humidity:	RH 5% to 95% Non condensing

Installation

Mounting:	
Rating from 16 to 40A:	Two symetric DIN rail EN50022 or bulkhead mounting (4 x M4 screws)
Rating from 63 to 100A:	Bulkhead mounting (4 x M4 screws)
Rating from 125 to 160A:	Bulkhead mounting (4 x M6 screws) Allow a minimum of 10mm between units Units must be mounted with fins running vertically

Max. cable size

16 and 25 amp:	6mm ² - AWG10
40 and 63 amp:	16mm ² - AWG6
80 and 100 amp:	35mm ² - AWG2
125 to 160 amp:	120mm ² - AWG4/0

Protection

Thyristor protection:	Varistor and RC snubber
High speed fuses:	

rating ≤100A:	External (optional)
rating ≥125A:	Internal. No fuse for short wave infrared elements if firing at zero crossings or in phase angle firing mode without current limit
Electrical protection:	IP20 without adding additional protection Overvoltage category II

Warranty

2 years

230V 230 volt supply

Note
1. Only available if MOP is selected

Please note that replacement fuses are marked with a higher current rating than the thyristors. This allows correct operation at elevated temperatures and does not imply that higher current is permissible.
