EPack

Compact SCR Power Controller

... delivering real savings – significantly reducing your energy costs

EPack power controller is a compact fully featured power controller from Eurotherm, combining a high level of functionality and configurability with simplicity of setup and operation. The combination of advanced configurable firing modes allows close matching to load characteristics for maximum process efficiency. EPack is highly configurable and may be adapted for current and future needs using a software key to purchase additional functionality when needed.

Ratings and Physical Format

EPack power controllers are designed to carry currents from 1 to 125 amps, with operating voltage between 100 and 500 Volts. It has a compact DIN rail and bulkhead mounting format in four mechanics depending on the current rating (16A to 32A, 40A to 63A, 80A to 100A or 125A). The units are specified for normal operation up to 45°C. There are two options for auxiliary power supply, 24V ac/dc or 100-500V ac.

The Display

Clear visualisation of all operating and configuration information is available on the clear, high definition 1.5" TFT display. This includes alarm indication as well as process and operating data such as nominal current, load voltage and energy usage. Should a control system fault occur, clear messages allow the precise origin of the problem to be determined, reducing down-time.

- **Nominal load current from 1 amp to 125 amps**
- **Voltage up to 500V**
- **Compact DIN Rail and bulkhead Mounting Format**
- **Configurable via Eurotherm iTools (PC software) or front panel**
- **Plug and play Ethernet communications with Zero configuration networking (zeroconf)**
- **V2, I2 or True power control**
- **Controls comprehensive range of loads: resistive, infrared, transformer primary, molybdenum disilicide, silicon carbide**
- **Energy usage measurement**
- **Advanced load diagnostics**
- **Integrated dual port Ethernet switch for "daisy chained" communications**
- **Modbus® TCP protocol**

Applications

- **Plastic**
  – Extrusion, Injection moulding
- **Food and Beverage**
  – Drying, sterilization, baking
- **Glass**
  – Float manufacturing
- **Infra-red heating**

connect control improve

Eurotherm®

by Schneider Electric

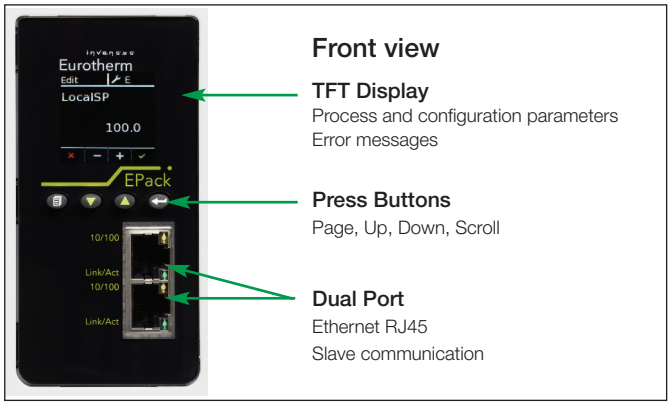

Communications

EPack power controller has Ethernet communications as standard, and includes an integrated dual port switch so that units may be "daisy chained". This allows integration with other plant equipment using standard Ethernet protocols such as Modbus/TCP, allowing connection to process and temperature controllers, Programmable Logic Controllers and SCADA/ Supervisory systems. Full diagnostic and operational data is available for use by higher level systems and to allow process improvements. Plug and play Ethernet connection is provided via "zero configuration" protocol.

Analogue communication for power setpoints is fully supported, using standard current and voltage inputs to the EPack unit.

Configuration

EPack is fully software configurable, with all options and advanced functions available when needed. Software modules may be purchased when required by use of a software key so that existing units may be adapted to changing needs over time. The instrument order code allows pre-configured units to be delivered ready for use, or alternatively a "Quick Start Code" using integrated HMI may be used to quickly configure for use. When a deeper level of configuration is required, Eurotherm iTools provides comprehensive access to all functions with context sensitive help.

Specification

General

Directive:		EMC directive 2004/108/EC Low Voltage Directive 2006/95/EC
Safety specification:		EN 60947-4-3:2000 (2000-01-12)
EMC emissions specification:		EN 60947-4-3:2000 (2000-01-12) + EN 60947-4-3:2000/A1:2006 (2006-12-08) + EN 60947-4-3:2000/A2:2011 (2011-09-02) Class A product
EMC immunity specification:		EN 60947-4-3:2000 (2000-01-12)
Vibration tests:		EN60947-1 annex Q category E
Shock tests:		EN60947-1 annex Q category E
Approvals:	cUL:	UL609747-4-1A and UL60947-1
	CE:	EN60947-4-3 and EN 60947-1
	GOST-R:	Certificate of exemption
Protection (According to EN60529):		IP10 (16A to 63A units) IP20 (80A to 125A units)

Condition of use

Directive:	EMC directive 2004/108/EC
Atmosphere:	Non-corrosive, non-explosive, non-conductive
Usage temperature:	0 to 45°C
Stocking temperature:	–25°C to 70°C (maximum)
Altitude:	1000m maximum at 45 degrees
Degree of pollution:	Degree 2

Mechanical Details

Unit	Height	Width	Depth	Weight
16 to 32A	129.2mm	51mm	136.2mm	0.8kg
40 to 63A	129.2mm	72mm	158.2mm	0.95kg
80 to 100A	197.6mm	80mm	202.1mm	1.8kg
125A	197.6mm	120mm	202.1mm	2.5kg

Mounting: DIN rail or bulkhead mounting

EPack	Fuse without microswitch		Fuse with microswitch	
Current rating	Fuse holder Size	Dimensions (H x W x D)	Fuse holder Size	Dimensions (H x W x D)
≤ 25A	10 x 38	81 x 17.5 x 68	14 x 51	110 x 26.5 x 94
32A	14 x 51	97 x 26.5 x 86	14 x 51	110 x 26.5 x 94

80A	27 x 60	240 x 38 x 107	27 x 60	240 x 53 x 107
100A	27 x 60	240 x 38 x 107	27 x 60	240 x 53 x 107
125A	27 x 60	240 x 8 x 107	27 x 60	240 x 53 x 107

Power

Nominal current:		1 to 125 amps
Nominal voltage:		100V to 500V +10%/–15%
Frequency:		47Hz to 63Hz
Protection:		High speed fuse
Type of loads:	AC51:	Pure resistive
	AC-55b:	Infra Red (With Derating)
	AC-56a:	Transformer Primary or MOSI (e.g. Molybdenum disilicide) Time temperature dependant loads (e.g.Silicon Carbide)

Control

Auxillary power supply:		100V to 500V +10%/–15% or 24 ac/dc (±20%)
Control setpoint:		Analogue or logic input or digital comms
Analogue input signal:		
Voltage:	Range:	0-5V, 1-5 V, 0-10V or 2-10V
	Impedance:	140 K ohms typical (0-10V signal)
Current:	Range:	0-20mA or 4-20mA
	Input resistance:	100 ohms to allow for three units wired in series to be driven from a single Controller's analogue output
Resolution:		11 bits
Linearity:		±0.1% of Scale
Firing mode:		Phase angle Intelligent Half cycle Variable Modulation Burst firing (Default 16 cycles) Fix modulation period (default 2 seconds) Logic mode
Control mode:		V^2 control, I^2 control, True Power control, Open loop with feed forward and Trim modes, Threshold limit or by transfer V^2 <->I^2 or P <-> I^2
Two digital inputs		Both configurable (input 1 enable by default)
	Voltage inputs	Active level (high) 4.4V<Vin<30V Non-active level (low) -30V<Vin<+2.3V Input impedance: 27kW (typ.) for voltage input mode
	Contact closure inputs	Source current: 10mA min; 15mA max Open contact (non active) resistance: >500W Closed contact (active) resistance: <150W Absolute Maxima ±30V or ±25mA
One Alarm Relay:		Changeover relay -2A rms – 264V rms – normally energised This relay will be de-energised in case of serious alarms: short circuit thyristor, open circuit, fuse blown, missing main, chop off

Communications

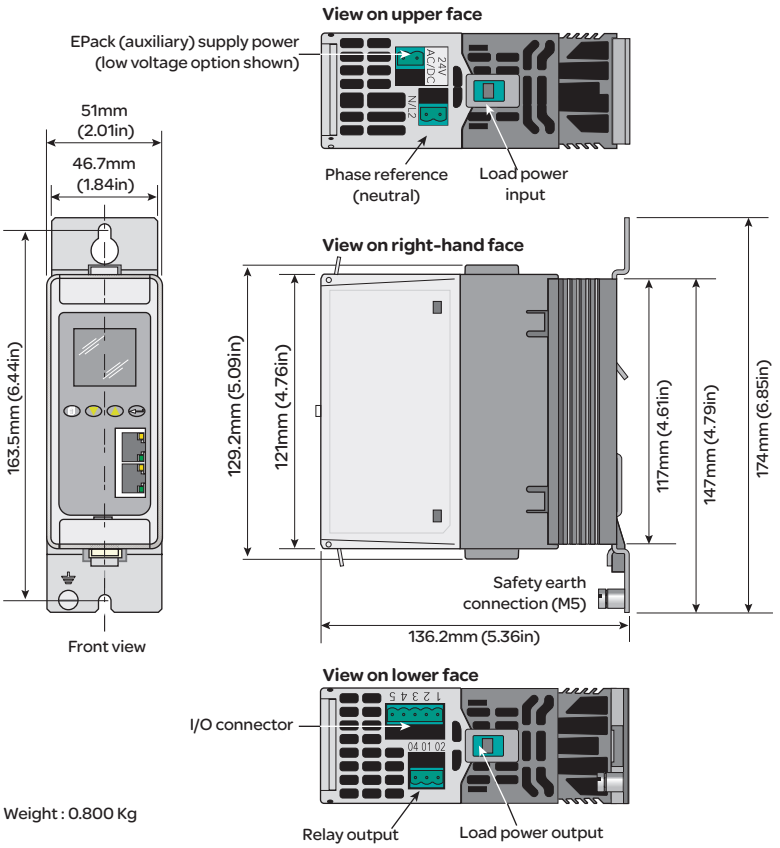

Connection:	Dual port Ethernet - RJ45 Integral switch
Protocol:	Modbus TCP
Baud rate:	10/100 full or half duplex

Display

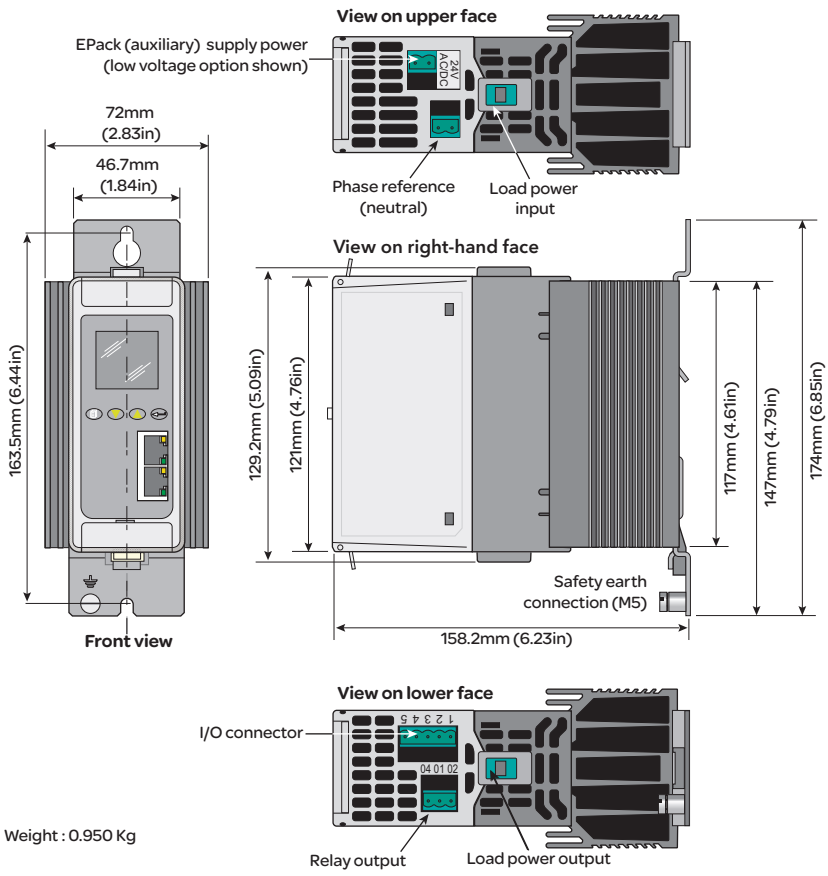

Technology:	TFT
Size:	1.5"
Messages:	Messages for configuration, monitoring and fault

Order code

EPack power controller is ordered using a short code for hardware and chargeable software options and an optional extended code section configuration of commissioning options.

If the extended code is not used, software configuration is completed using a quick start procedure or using Eurotherm iTools software.

EPack may be upgraded with additional chargeable options at any time using a software key order code.
