Intelligent software designed to make your work easier

MELSOFT iQ Works is a project management software solution that integrates the various programming and design software applications for Mitsubishi Electric's programmable controllers, motion controllers and GOT's. The result is one seamless engineering environment.

iQ Works software supports:

- **Basic and high performance Q CPUs**

- **Universal iQ CPUs**

- **FX Series**

- **New Series CPUs to come**

- **Melsec L Series**

GOT Project

RT Toolbox 2

Software Range

iQ Works
Is the integrated engineering software suite which includes Navigator, GX Works2, MT Works2 and GT Works3.

Melsoft Navigator
The Navigator is the heart of iQ Works. It enables the effortless design of entire upper-level systems and seamlessly integrates the other MELSOFT programs included with iQ Works.

GX Works2
GXWorks2 's functionality has been inherited from both GX and GX IEC Developer, with improvements made throughout to increase productivity and drive down engineering time and costs. GX Works2 will also have GX Developer included to provide legacy support for previous versions.
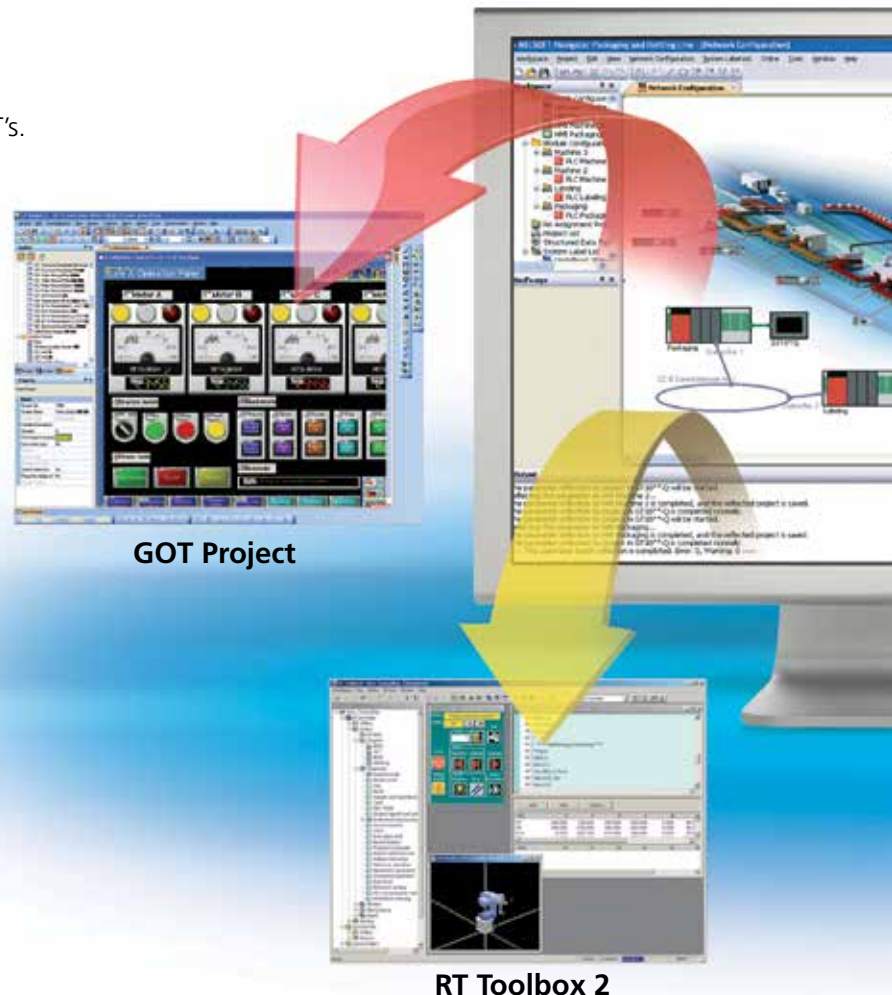

MT Works2
MT Work2 is a comprehensive motion CPU maintenance and program design tool. It has many useful functions, such as intuitive settings, graphical programming, and digital oscilloscope, simulator and assistance help.

GT Works3
This is a complete HMI programming, screen creation, and maintenance program for GOTs. The software's functionality has been built around the concepts of ease of use, simplification and elegance in design and screen graphics.

RT Toolbox 2
RT Toolbox 2 is the programming environment for all Mitsubishi MELFA robots. It enables you to create programs in minutes using the MELFA BASIC V robot languages. After testing and optimisation it then just takes a couple of mouse clicks to transfer them to the actual robots.

iQ Works

MELSOFT

Part of the MELSOFT
family of software

**Motion
Controller Project**

**Programmable
Controller Project**

Training

Mitsubishi Electric also offers a wide range of training
courses for our software solutions. For more information on
training courses and available dates please visit:
